

# **Accreditation system's tools to prevent frauds in Italy**

***Nuremberg, Friday 13th February***

Accredia is the Italian accreditation body recognized by the Italian Government since December 2009 according the EU regulation 765/08

According the EU regulation when the National Accreditation Body is not part of the public organization it shall be a not profit organization.

ACCREDIA is a non profit organization with 9 Ministries in its company structure, including the Agriculture Ministry, the Competent Authority in the organic farming field

# **REGULATION (EC) No 765/2008 setting out the requirements for accreditation and market surveillance relating to the marketing of products**

## **Art. 4 comma 5**

Member State shall entrust its national accreditation body with the operation of accreditation as a public authority activity and grant it formal recognition

# ISO/IEC 17011

## Introduction

In today's society it is often required to state objectively conformity of products (including services) to specified requirements. Conformity assessment bodies (CABs) can objectively state such conformity.

It is important for the purchaser, regulator and the public to know that these CABs are competent to perform their tasks. For that reason there is an increasing demand for impartial verification of their competence. Such verification is done by authoritative accreditation bodies that are impartial in relation to both the CABs and their clients. A system to accredit CAB conformity assessment services should provide confidence to the purchaser and regulator. Such a system should facilitate cross-border trade, as pursued by trade authorities and organizations.

*In other words accreditation is a tool improving the confidence for the consumer about the conformity attestations circulating on the market.*

*According this principle Accredia has developed on its website several databases even if not required to the requirements of ISO 17011.*

*The available databases are:*

- *Organizations with management system certified (ISO 9001, ISO 14000)*
- *FSMS certified organizations/companies (ISO 22000)*
- *Organic controlled operators (Reg. 834/07)*
- *Certified services (ENEL/TERNA training)*
- *Professional persons*
- *Certified Call Centers*
- *Management system certifications data*

*Recently ACCREDIA has signed an agreement with the Italian Agency with competence on the surveillance on the public procurements in construction sector (AVCPASS), AVCPASS collaborates with the National Agency against corruption (ANAC) the information available on the database are part of the control system.*

*Another agreement has been established with the National Chambers of Commerce. information about the certification are available on the chamber commerce certificate, as well as for the control body the information about their accreditation is now available on the chamber commerce certificates*

*In organic farming scheme (Reg. 834/07) ACCREDIA has started to develop a database (DATABIO) with multiple objectives, on the basis of a voluntary agreement established with the accredited CBs, at the moment the agreement has been signed by 9 CBs covering more than 95% of the organic farming operators.*

*The DATABIO system is based on three different sections, one of those is public available the others two are available in a restricted area.*

*The access to the restricted area is allowed only at the CBs, ACCREDIA and the Competent Authorities involved in the market surveillance if they wish*

*The public area provides the following information :*

- *list of certified operators and list of the certified products;*
- *an easy way for the market for searching who produces what*

## Operatori Biologici

La banca dati degli operatori biologici è gestita da ACCREDIA e contiene i dati relativi alle certificazioni rilasciate dagli Organismi accreditati per i soli operatori a cui è stato rilasciato il Documento Giustificativo.

CERCA

Le certificazioni delle organizzazioni deve essere richiesta direttamente all'Organismo di certificazione di competenza, o, occorre rivolgersi direttamente all'Organismo che ha rilasciato il certificato.

*In the restricted area will be available all the Non Conformities issued by the Control Bodies. The system provides a tool to be in compliance at the article 31 of the Reg. 834/07 (exchange of information) and the Control Bodies can exchange those information between themselves on real time.*
