Complexity and technical
challenges at the FIP-Project

Intact's competences

Audit and
certification management

ECERT

Supply chain
traceability

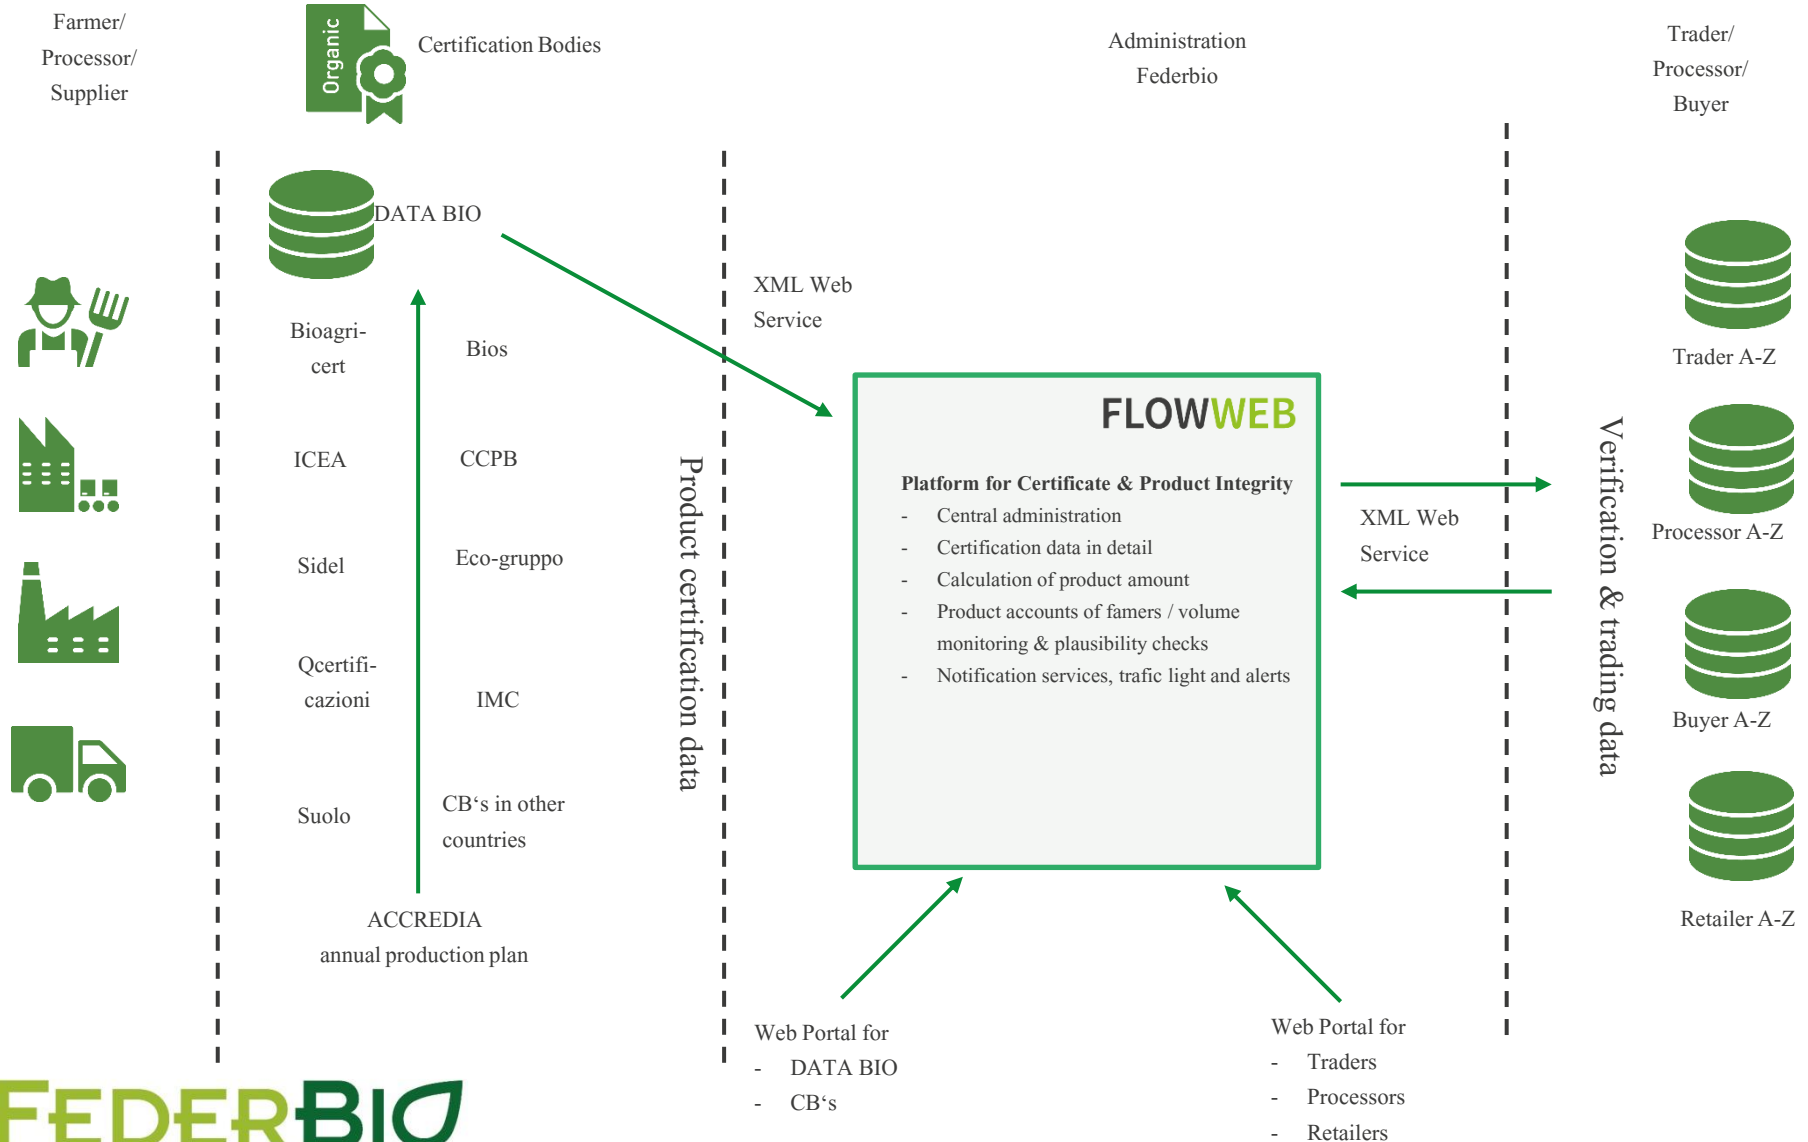

FLOWWEB

Quality management for agricultural products

NUTRIWEB

Data Bio – Federbio Integrity Platform

Challenges at the FIP-Project

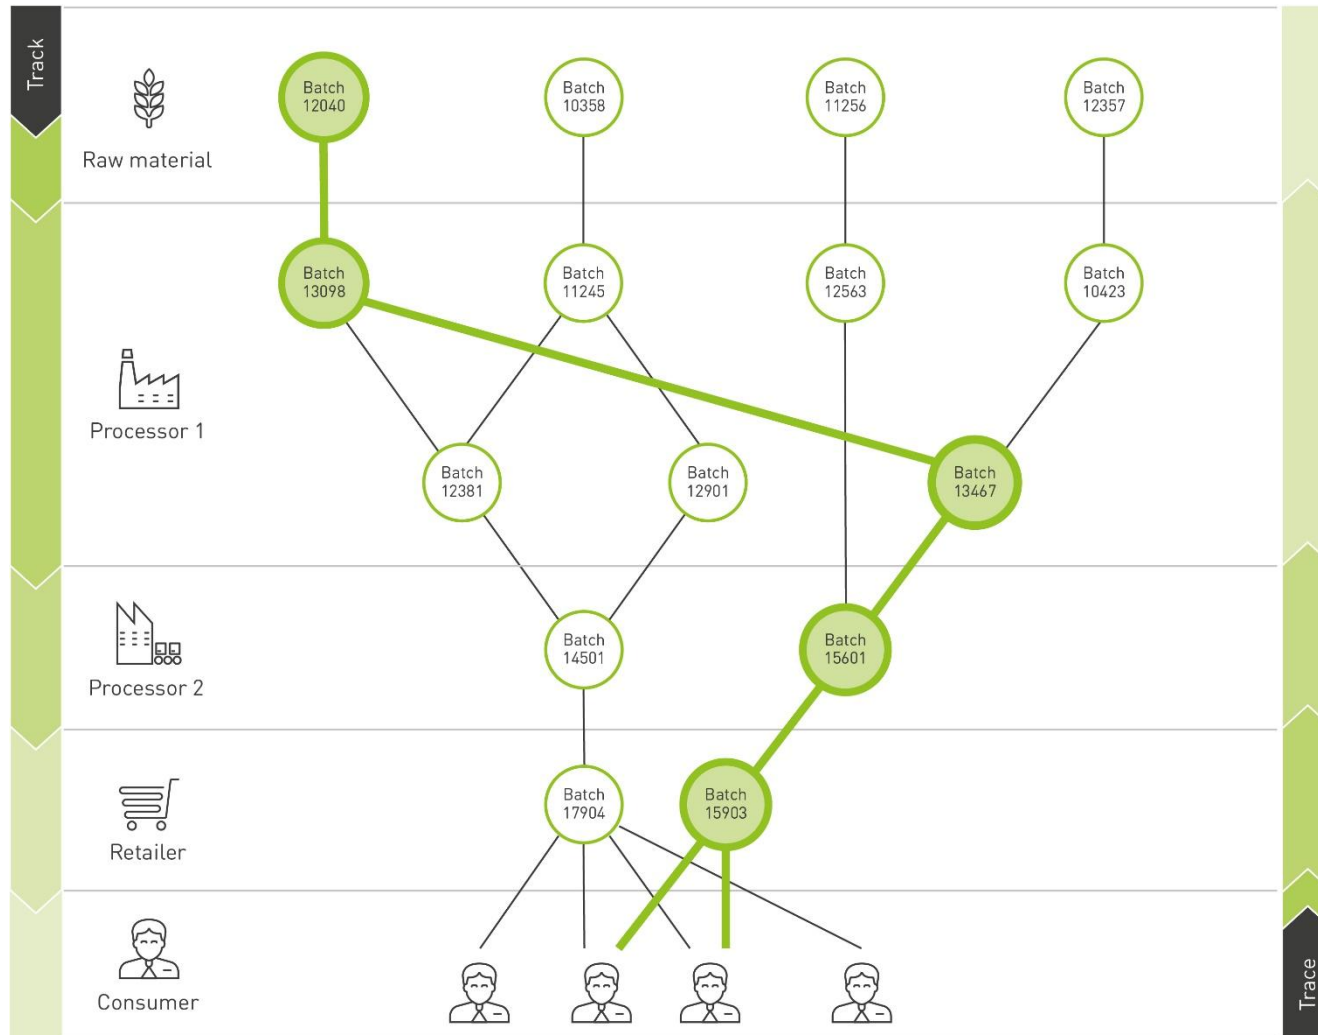

- Find unique IDs of farmers (VAT number)
- Find unique IDs of products (customs tariff number)
- Complexity of the whole project
 - Integration of the official PAP
 - Different certified products through different CBs
 - No standard interfaces between the participants
 - No unique product codes between traders and processors

Current project status

- FIP is completed and ready (Jan 2015)
- Pilot phase with selected processors and traders (Feb-May 2015)
- Full implementation for harvest season 2015 (June 2015)

Future option:

Batch tracking & tracing
